# FASTENERS FOR USE WITH PC BOARDS

PEM® brand fasteners that utilize,  
surface-mount, broaching and flaring  
technology for use with PC boards.

No matter how sophisticated or advanced, electronic components must be attached reliably and securely if they are to deliver optimum performance. We offer several fastener products for use with PC boards to satisfy component-to-board, board-to-board, and board-to-chassis attachment needs.

**ReelFast® surface mount fasteners** mount on PC boards in the same manner and at the same time as other surface mount components prior to the automated reflow solder process. The fasteners simply become another board component. This alleviates concerns about potential damage to PC boards due to improper secondary installation operations. The fasteners are provided on tape and reel compatible with existing SMT automated installation equipment. The benefits of using ReelFast® SMT fasteners are: faster assembly; reduced scrap; reduced handling; and reduced risk of board damage.

**Broaching fasteners** can also offer practical alternatives to "loose" hardware. A broaching fastener is a knurled-shank fastening device that can be pressed into a hole to provide a permanent, strong, threaded or unthreaded attachment point in PC boards. They can also be used in aluminum, acrylic, casting and polycarbonate components. Specially formed axial grooves around the shank of the fastener "broach" or cut into the material, creating a firm, interference-type fit resistant to rotation. In PC boards, broaching fasteners are recommended for use in non-plated holes.

**Broach/flare-mount standoffs** (KFB3™) offer a combined broach/flare feature for even greater pullout performance in PC board materials.

Fastener drawings and models are available at [www.pemnet.com](http://www.pemnet.com). Custom sizes are available on special order. [Contact us](#) for more information.

#### Nuts And Spacers/Standoffs

**SMTBSO™** - ReelFast® surface mount fasteners with internal blind-hole threads - [PAGE 4](#)

**SMTSO™/SMTSOB™** - ReelFast® surface mount nuts and standoffs are available threaded and unthreaded - [PAGE 5](#)

**SMTSS™** - ReelFast® SNAP-TOP® standoffs feature a spring action to hold PC board securely without screws or threaded hardware - [PAGE 6](#)

**SMTSK™** - ReelFast® KEYHOLE® standoffs eliminate the need for attaching screws - [PAGE 7](#)

**KFE™/KFSE™** - Broaching standoffs, threaded or unthreaded for stacking or spacing - [PAGE 8](#)

**KF2™/KFS2™** - Broaching nuts, internally threaded for mounting on PC boards - [PAGE 9](#)

**KFB3™** - Broach/flare-mount standoffs with greater pullout performance - [PAGE 10](#)

**KSSB™** - Broaching, SNAP-TOP® standoffs feature a spring action to hold PC board securely without screws or threaded hardware - [PAGE 11](#)

#### Captive Panel Screws

**SMTPFLSM™** - ReelFast® surface mount spring-loaded captive panel screws - [PAGE 12](#)

**SMTPF™** - ReelFast® surface mount captive panel screws - [PAGE 13](#)

**PFK™** - Broaching panel fastener assemblies for mounting on PC boards - [PAGE 14](#)

#### Studs

**KFH™** - Threaded broaching studs for use as solderable connectors or as permanently mounted studs on PC boards - [PAGE 15](#)

#### Right Angle Fasteners

**SMTRA™** - ReelFast® R'ANGLE® surface mount fasteners provide strong re-usable threads at right angles to PC boards - [PAGE 16](#)

#### Sheet Joining Fasteners

**SFK™** - SpotFast® clinch/broach mount fasteners for joining metal to PCB/plastic panels - [PAGE 17](#)

#### Material and Finish Specifications

- [PAGE 18](#)

#### Installation

- [PAGE 18-20](#)

#### Performance Data

- [PAGE 21-23](#)

#### Other fasteners for use with PC boards

- [PAGE 24](#)

## Quick Reference Chart

## SMTBSO™ ReelFast® Surface Mount Fasteners

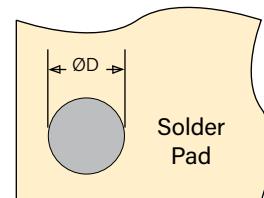

- Internal blind-hole threads securely mounts onto PC Board - less risk of damage to PC Board during assembly
- Allows for copper traces to run under the fastener which better utilizes space on the board
- Enhanced PC Board performance due to cut out of the fastener that allows for localized heat up of the area in contact with the solder

### Part Number Designation

**SMTBSO - 440 - 6 ET**

Packaged on 330 mm recyclable reels. Tape width is 24 mm. Reels conform to EIA-481.

A polyimide patch is supplied to allow for reliable vacuum pickup. Fasteners are also available without a patch which may provide a lower cost alternative, depending on your installation methods/requirements.

## SMTSS™ Reelfast® Snap-Top® Standoffs

**NOTE:** REELFAST® SNAP-TOP® SMTSS™ standoffs are for on-only applications. For removal applications, mounting hole A can be increased to reduce removal force.

## Note About Plated And Unplated Mounting Holes For Broaching Fasteners

Broaching and broach/flare types are designed for unplated mounting hole applications. If used in plated mounting holes, the stresses involved can damage the plating, push out the plating entirely, or break any traces inside the board that might be connected to the plated hole. When installing into non-plated mounting holes there may even be issues with delamination, measeling or crazing in some instances.

Increasing the mounting hole size +.005" to +.008" / +.013 mm to +.02 mm may relieve these conditions. If increasing the mounting hole does not correct the issue then we recommend our surface-mount type fasteners.

It is always recommended that you try the fasteners in your specific application before full production begins. We are happy to provide samples for this purpose.

General recommendations for "Keep Out" areas are the same as our "Min. Distance Hole C/L to Edge" dimensions stated in the dimensional charts of our bulletin.

(1) Fastener will provide flush application at minimum sheet thickness.

(2) For more information on proximity to bends and distance to other clinch hardware, see [PEM® Tech Sheet C/L To Edge](#).

Can be used as a single flush-mounted pivot point. For more information, please contact [techsupport@pemnet.com](mailto:techsupport@pemnet.com)

Type SFK joining metal to PCB/plastic.

Part Number Codes For Finishes								ZI	ET	CN				

- (1) For plated studs, Class 2A/6g, the maximum major and pitch diameter, after plating, may equal basic sizes and can be gauged to Class 3A/6h, per ASME B1.1 Section 7, Paragraph 2 and ASME B1.13M, Section 8, Paragraph 8.2.
- (2) See PEM Technical Support section of our web site for related plating standards and specifications.
- (3) HRB - Hardness Rockwell "B" Scale. HB - Hardness Brinell.
- (4) Optimal solderability life noted on packaging.
- (5) ABS cap on PSHP screw has a temperature limit of 200° F / 93° C.
- (6) The tin deposit on type SMTSOB meets the requirements of ASTM B545, Class A and although the copper and nickel barrier layers used under the tin do not strictly comply with ASTM B545 thickness requirements they have proven effective at preventing zinc migration and providing the specified solderable shelf life.

## Installation

### KF2™/KFS2™/KFE™/KFSE™/PKF™ Fasteners

1. Prepare properly sized mounting hole in board.
2. Place fastener into the anvil hole and place the mounting hole over the shank of the fastener as shown in drawing.
3. With installation punch and anvil surfaces parallel, apply squeezing force until shoulder contacts the board.

## KFB3™ Fasteners

1. Prepare properly sized mounting hole in board.
2. Place fastener into the anvil hole and place the mounting hole over the shank of the fastener as shown in diagram.
3. Using a punch flaring tool and a recessed anvil, apply squeezing force until the shoulder of the fastener contacts the board. As the fastener seats itself in the proper position, the punch tool will flare the extended portion of the shank outward to complete the installation. The combination of broaching and flaring provides high pushout performance.

## SFK™ Fasteners

- Step 1. Prepare properly sized mounting hole in both panels.
- Step 2. Using only Panel 1, with the punch and anvil surfaces parallel, apply squeezing force until the fastener is flush with the top of Panel 1.
- Step 3. Place Panel 2 over fastener and apply squeezing force.

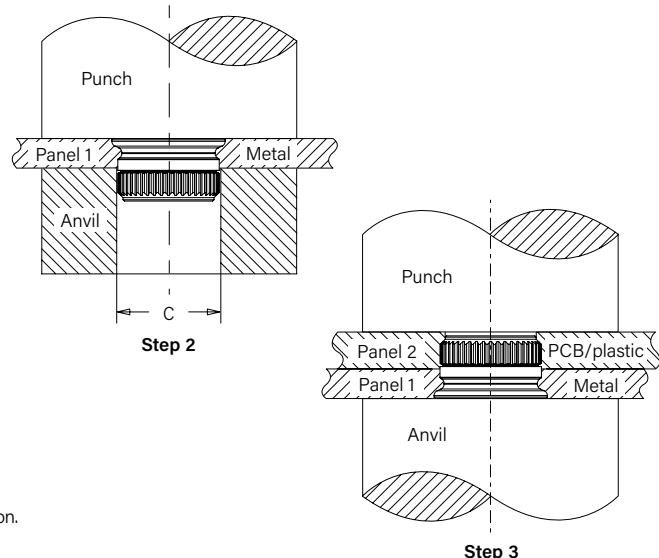

### PEMSERTER® Installation Tooling (1)

Size	C ±0.13/±0.03 (mm) / (in.)	Punch Part No.	Anvil Part No.*
SFK-3	3.05/.120	975200048	970200229300
SFK-5	5.05/.199	975200048	970200020300

\* Part number for anvil used in Step 2

NOTE: Fastener can be installed in both sheets at once when metal panel is adequately soft compared to the non-metal panel. E-mail [techsupport@pemnet.com](mailto:techsupport@pemnet.com) for more information.

(1) [Click here](#) for a quote on Haeger® custom installation tooling.

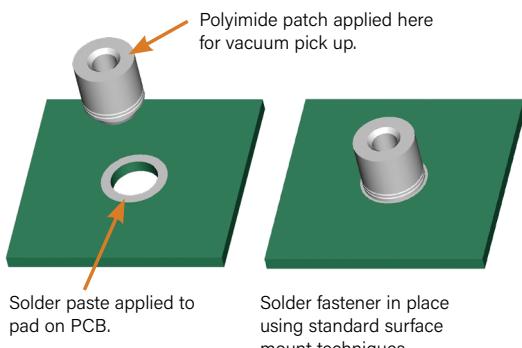

## Installation Notes

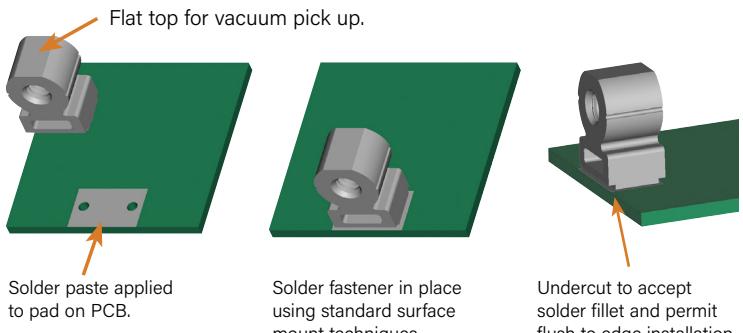

- For best results we recommend using a HAEGER® or PEMSERTER® press for installation of PEM self-clinching fasteners. Please check our website for more information.
- Visit the Animation Library on our website to view the installation process [for select products](#).

- (1) Published installation forces are for general reference. Actual set-up and confirmation of complete installation should be made by observing proper seating of fastener as described in the installation steps. Other performance values reported are averages when all proper installation parameters and procedures are followed. Variations in mounting hole size, sheet material, and installation procedure may affect performance. Performance testing this product in your application is recommended. We will be happy to provide technical assistance and/or samples for this purpose.
- (2) These are typical values for parts installed in drilled mounting holes. Punched mounting holes yield values approximately 15% less.
- (3) Not applicable.
- (4) See Application Data drawing on page 10.
- (5) The maximum carrying current for each of the above fasteners is calculated based on a heat transfer coefficient of 20 W/m<sup>2</sup> °K and a maximum temperature rise of 15°C / 27°F above ambient.

- (1) With lead-free paste. Average values of 30 test points. The data presented here is for general comparison purposes only. Actual performance is dependent upon application variables. We will be happy to provide samples for you to install. If required, we can also test your installed hardware and provide you with the performance data specific to your application.
- (2) Further testing details can be found in our website's literature section.
- (3) In most applications, pullout strength of the SFK fastener in Panel 1 exceeds pushout strength of Panel 2.
- (4) Torque values shown will produce a preload of 70% minimum tensile with a nut factor "k" equal to .1.
- (5) Failure occurred at the solder joint. Screw retention strength is greater than the retainer.
- (6) The maximum carrying current for each of the above fasteners is calculated based on a heat transfer coefficient of 20 W/m² °K and a maximum temperature rise of 15°C / 27°F above ambient.

## SMTSS™ ReelFast® SNAP-TOP® Standoffs<sup>(1)(2)</sup>

Type, Material and Size	Panel 1 (Bottom)	Panel 2 (Top)
Test Sheet Material	Pushout	Max. Snap-on Force
SMTSS-156	.062" Single Layer FR-4	113 lbs.
SMTSS-4MM	1.58 mm Single Layer FR-4	500 N

## SMTSK™ Keyhole® Standoffs<sup>(1)(2)</sup>

Type and Size	Panel 1 (Bottom)
Test Sheet Material	Pushout
SMTSK-6060	.062" Single Layer FR-4
SMTSK-61.5	1.58 mm Single Layer FR-4

## SMTRA™ R'ANGLE® Fasteners<sup>(1)(2)</sup>

Unified	Part Number	Test Sheet Material - .062" Single Layer FR-4	
		Pushout (lbs.)	Side Load (lbs.)
SMTRA256-8-6		51.7	71
SMTRA440-9-6		89.5	10.8
SMTRA632-10-8		110.3	8.4
SMTRA832-12-9		137.2	21.2

Metric	Part Number	Test Sheet Material - 1.58 mm Single Layer FR-4	
		Pushout (N)	Side Load (N)
SMTRAM2-6-5		418.2	56.8
SMTRAM25-6-5		216.5	36.9
SMTRAM3-7-5		257.6	41.3
SMTRAM4-9-7		369.3	73.3

## SMTBSO™ Fasteners<sup>(1)</sup>

Part Number	Test Sheet Material - .062"/1.58mm Single Layer FR-4				Rated Current Amps <sup>(6)</sup>
	Pull Off (lbs.)	Pull Off (N)	Torque-out (in. lbs.)	Torque-out (N-m)	
SMTBSO-440-6	61	—	15.4	—	12
SMTBSO-M3-4	—	270	—	1.75	22

## SMTPFLSM™ Fasteners<sup>(1)</sup>

Unified	Type and Thread Size	Min. Tensile Strength (lbs.)	Rec. Tightening Torque (in. lbs.) (4)	Test Sheet Material
				.060" P.C. Board
				Pull-off (lbs.) (5)
	SMTPFLSM-440	556	4.4	100
	SMTPFLSM-632	724	7.0	105

## SMTPR™ Retainers<sup>(1)</sup>

Part Number	Test Sheet Material - .062" Single Layer FR-4	
	Pushout (lbs.)	Pushout (N)
SMTPR-6-IET	161.4	718

Metric	Type and Thread Size	Min. Tensile Strength (N)	Rec. Tightening Torque (N-m) (4)	Test Sheet Material
				1.5 mm P.C. Board
				Pull-off (N) (5)
	SMTPFLSM-M3	2900	0.61	445
	SMTPFLSM-M3.5	3269	0.8	465

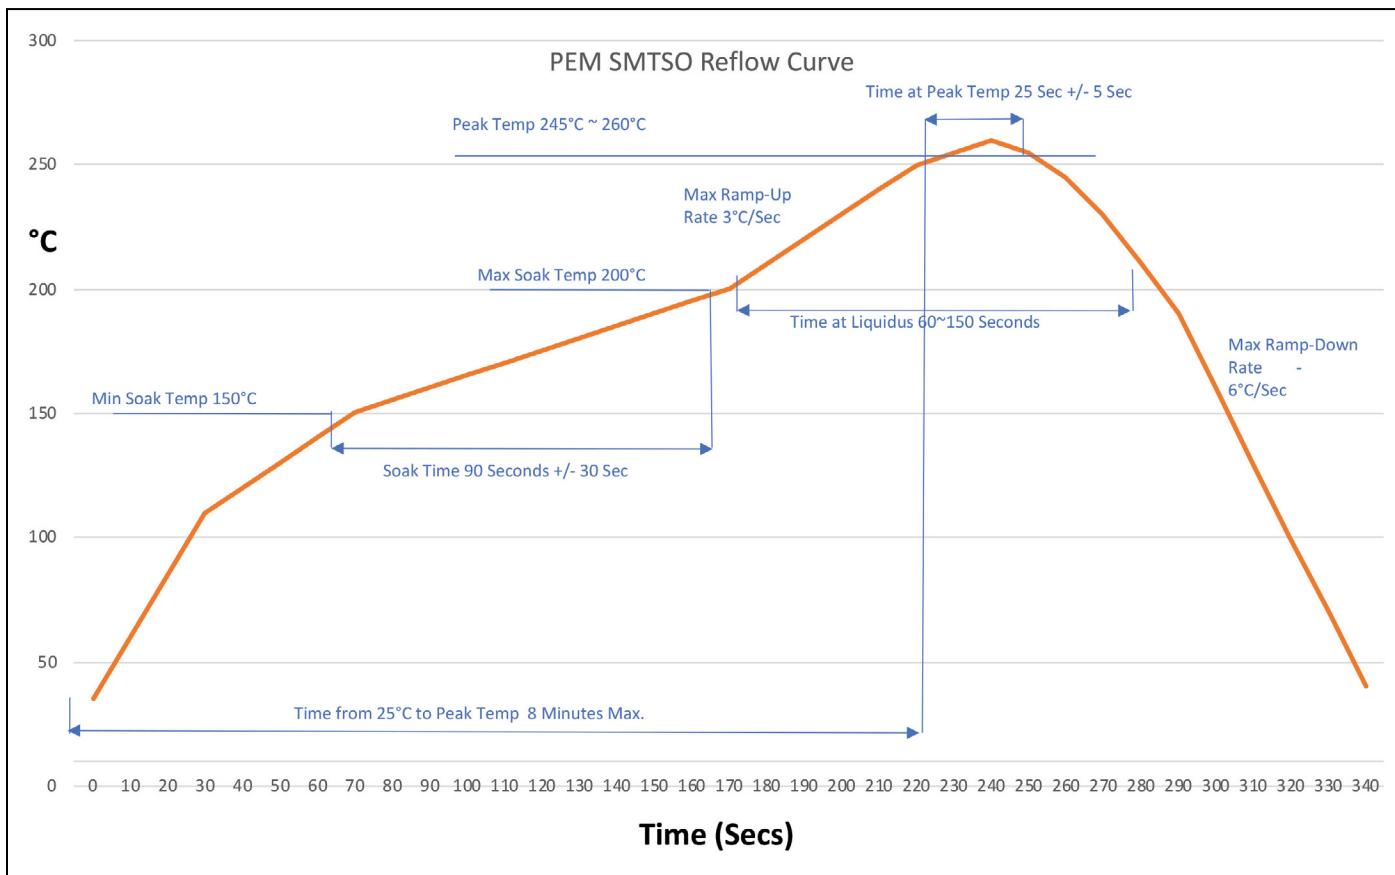

## Testing Conditions For Surface Mounted Fasteners

**Oven** Quad ZCR convection oven w/ 4 zones  
**High Temp** 473°F / 245°C  
**Board Finish** 62% Sn, 38% Pb  
**Screen Printer** Ragin Manual Printer  
**Vias** None

**Spokes** 2 Spoke Pattern  
**Paste** Amtech NC559LF Sn96.5/3.0Ag/0.5Cu (SAC305) (SMTSO, SMTRA, SMTPR)  
 Alpha CVP-390 Sn96.5/3.0Ag/0.5Cu (SAC305) (SMTPFLSM, SMTSS, SMTSK)  
**Stencil** .0067" / 0.17 mm thick (SMTSO, SMTRA, SMTPR, SMTSS, SMTSK)  
 .005" / 0.13 mm thick (SMTPFLSM)

- (1) With lead-free paste. Average values of 30 test points. The data presented here is for general comparison purposes only. Actual performance is dependent upon application variables. We will be happy to provide samples for you to install. If required, we can also test your installed hardware and provide you with the performance data specific to your application.
- (2) Torque values shown will produce a preload of 70% minimum tensile with a nut factor "k" equal to .1.
- (3) Failure occurred at the solder joint. Screw retention strength is greater than the retainer.

## SMTSO™ Reflow Curve

## Other Fasteners For Consideration To Use With PC Boards

### PF11MW™ Floating Captive Panel Screws

(See PEM® Bulletin PF)

Unique flare mount feature allow fasteners to "float" in mounting hole.

- Compensates for mating thread misalignment.
- Installs into any panel material.
- Appropriate for close center-line-to-edge applications.
- Color coded knobs available.

Can install  
into PC  
Board,  
plastic  
or metal

### PF11MF™ Flare-Mounted Captive Panel Screws

(See PEM® Bulletin PF)

- Appropriate for close centerline-to-edge applications.
- Doesn't require high installation force.
- Installs into any panel material.
- Installs flush on back side of panel.
- Color coded knobs available.

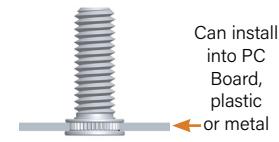

Can install  
into PC  
Board,  
plastic  
or metal

### SGPC™ Swaging Collar Studs

(See PEM® Bulletin FH)

- Can be installed into most materials, including stainless steel and rigid non-metallic panels.
- Can be used to attach dissimilar materials.
- Can accommodate multiple panels as long as the total thickness does not exceed the maximum sheet thickness.
- Appropriate for close center-line-to-edge applications.

Can install  
into PC  
Board,  
plastic  
or metal

### SOAG™/SOSG™ Grounding Standoffs

(See PEM® Bulletin SO)

- Designed for clinching into steel or aluminum chassis.
- "Gripping teeth" on opposite side of standoff makes firm electrical contact with mating PC Board.

PC Board  
plastic or  
metal

Metal

### SKC™ Keyhole® Standoffs

(See PEM® Bulletin SK)

- Clinch feature mounts fastener permanently into metal sheet.
- Allows for quick attachment and detachment of PC Board.
- Head is flush or sub-flush in metal sheet.
- Makes horizontal or vertical component mounting possible.

PC Board  
plastic or  
metal

Metal

### SSA™/SSC™/SSS™ Snap-Top® Standoffs

(See PEM® Bulletin SSA)

- Spring action holds PC Boards and subassemblies securely, while allowing for quick removal.
- Screws and other threaded hardware are eliminated.

PC Board  
plastic or  
metal

Metal

For more information on these and other PEM products, visit our PEMNET™ Resource Center at [www.pemnet.com](http://www.pemnet.com)

All PEM® products meet our stringent quality standards. If you require additional industry or other specific [quality certifications](#), special procedures and/or part numbers are required. Please contact your local sales office or representative for further information.

Regulatory [compliance information](#) is available in Technical Support section of our website. Specifications subject to change without notice. See our website for the most current version of this bulletin.
